1. An ammunition dump composed of 13 buildings is located approximately 350 meters northwest of the Slivnitsa-Opitsvet highway, approximately 1.2 kilometers south of Opitsvet village. Twelve of these buildings were used to store ammunitions and one was used as a guardhouse. (A sketch showing the location of the ammunition dump is included as Appendix A on page 2).
2. Two of the buildings used to store ammunition house artillery shells for howitzers and Soviet ZIS artillery pieces; one of these buildings contains detonator caps, fuses, and other explosives.
3. The ammunition dump is guarded by an Army detachment of 12 soldiers commanded by a sergeant. Two guard posts are located as follows:
 - a. One, in the southeast corner of the ammunition dump; and
 - b. One, approximately mid-way on the northeastern side.

The dump is patrolled twice at night and usually once during the day. Night guards are on duty between 6:30 p.m. and 5 a.m., and usually carry a submachine gun. (A sketch showing the layout of the ammunition dump is included as Appendix B on page 3).

4. Troops assigned to guard this dump are taken from units stationed at the summer Army camp located 1.6 kilometers east of the dump and one kilometer southeast of Opitsvet village.
